Run No.2179 – Blank's Bicycle Bonanza.

Preamble:

As per usual, Bloo was there before me and imparted the news that Blank had set off on his treadly to set/reset the Run. When Pyro arrived, he expressed some concern as to the viability of the Trail given that Blank had set the Run on the weekend through territory which encompassed the Joondalup Festival. At the off Bully had garnered 10 and West Coast 8.

The Run:

There was promise of a Drink Stop and Blank fully expected everyone to make it. Trail was said to be all chalk with a separate Trail for Walkers. At the outset we were asked to walk together until we reached Blank's vehicle and only then were the Runners to part company. Diesel stayed behind to give Blank a hand with the Drink Stop.

The Trail was well marked as were the cut-offs for the Walkers. After a bit of Bush bashing early on, we meandered through the streets adjacent to ECU before entering the confines of the Uni. From there we headed North for a tour of the Joondalup CBD. Pyro and Alias gave it the arse early and one can only assume that they adjourned to the nearest Water Hole as they were not at the Bucket when your Scribe got back having parted company with the Pack. He had earlier announced the need to debunk early with apologies to the GM for missing the Circle.

The Rundown:

If you were there you know what went on.

Charges et al:

As above.

General Business:

And again

Song:

I assume that both were song with gusto.

Hareline: Any queries speak to the OnSec.
